

CORE COMPETENCIES

Integrated Biometrics (IB) is headquartered in Spartanburg, South Carolina. IB designs and makes FBI-grade fingerprint scanners that enable greater accessibility, convenience, and safety in nearly a hundred countries worldwide. Through partnerships with local institutions, our technology has been used to register voters in Guinea, provide access to financial services for the previously unbanked in Nigeria, secure patient records in rural Kenya, and create an anonymized, stigma-free HIV testing process in South Africa, among other examples. We are committed to enabling identification and opportunities, and the rugged, durable nature of our devices allow us to pursue projects that impact millions of people.

- Fingerprint biometrics
- FBI-certified
- FAP 30, 45, 50, and 60 (one, two, and ten-print)
- Patented LES technology instead of outdated optical sensors
- Durable, lightweight, low-power consumption
- Works under all weather conditions

Past Performance

- Financial inclusion in Nigeria
- Securing patient identities in rural Kenya
- Anonymizing the HIV-testing process in South Africa
- Improving quality of life for Alzheimer's patients in Taiwan
- Voter Registration in Guinea
- Preventing the misappropriation of food aid in Yemen
- Fraud prevention in the education system in Pakistan
- Recording identities of newborn infants at risk of exposure to HIV to improve postnatal care in Kenya
- Border control through US CBP

Differentiators

- LES technology vs optical sensors
- Durable, lightweight, low-power consumption
- Works under all weather conditions (direct sunlight, extreme temperatures, high and low humidity)

ORGANIZATION DATA

Small Business

Operations in SC, AZ, South Korea, China, South Africa

\$30—50 million

75 employees

Serving worldwide

DUNS Number: 828790472

NAICS Code: 334118
