

FINGERPRINT BIOMETRICS USED TO MITIGATE FRAUD

Mexican government agencies, banks, and other financial institutions are using fingerprint biometrics to facilitate the proper identification of individuals for electronic payments – such as the delivery of government subsidies – in an effort to mitigate fraud by individuals looking to scam the system.

In one such instance, the Mexican pension system is employing the Integrated Biometrics' Watson Mini two-finger roll scanner as part of a door-to-door effort to enroll and confirm the identities of a large number of retirees living in rural areas. Instead of relying on a person claiming to be a certain individual traveling to a central bank or government institution to collect payments, officials can bring identity management directly to individuals in their homes. Utilizing mobile electronic fingerprinting, officials can prevent and detect irregular practices.

PRODUCT SPECIFICATIONS

Amazingly small, incredibly durable, remarkably efficient FAP 45 scanner

IB's patented Light Emitting Sensor (LES) film produces the highest quality fingerprint images in the certified market

APPLICATIONS

Standalone fingerprint scanner

Embedded module for mobile applications also available

After confirming retirees' identities and enrolling them into the pension system, funds can be safely and efficiently delivered electronically. This saves institutions millions of dollars on phony payouts and prosecutions of con artists and identity thieves.

The easy-to-use Watson Mini FBI Appendix F certified multi-fingerprint scanner is small, light, and fast thanks to Integrated Biometrics' patented light emitting sensor (LES) film technology.

ABOUT INTEGRATED BIOMETRICS

Integrated Biometrics, LLC designs and manufactures FBI-certified fingerprint sensors for law enforcement, military operations, homeland security, national identity, election validation, social services, and a wide range of commercial applications. The company's patented light emitting sensor technology enables lightweight scanners that outperform traditional prism-based devices in size, power consumption, portability, and reliability. Identity management solutions providers, government agencies, and corporations around the world rely on Integrated Biometrics' products to enroll and verify individual identity quickly and accurately, even in remote locations.
