

INFANTIB™

Overview

InfantIB is the first scalable, high-accuracy family of biometric solutions designed to establish and protect a child's legal identity from birth. This ensures secure, traceable, and immutable proof of origin for citizenship, healthcare, and safety. InfantIB holds the key to fulfilling the promise of a life of dignity, safety and equity.

Supporting Benefits

1. Reliable & Accurate Identity Capture – Advanced biometric technology ensures clear, verifiable fingerprints, hand prints, and footprints, overcoming the challenges previously faced in the field of infant identification.

2. Establishes Immutable Proof of Origin – Connects legal identity to birth records, ensuring accurate birth registration and parental linkage. Traceability to Immutable Evidence of Origin - IEOs (When Born, Place Born, Parents) is key to Identity and Empowerment beginning at Day 1 of life.

3. Enhances Child Safety & Protection – Helps prevent identity fraud, child trafficking, and newborn misidentification through secure and traceable identification.

4. Mobile, Scalable & Accessible Anywhere – Designed for use in nearly every environment including hospitals, government offices, refugee & migrant camps and other remote locations, ensuring every child has access to identity-based services.

5. Comprehensive Biometric Capabilities – The InfantIB family of solutions provides governments, healthcare organizations, NGOs, IGOs and more with the tools they need to ensure a child's critical identification can be captured and protected.
